ε al perigeo [km²/s²]
Velocita geocentrica alla SOI [km/s]
100 × (massima − media) / massima [%]

Panoramica: riduzione BOX dei colori RGB su sfondo bianco; ogni pixel comprende tutta la sua area, non il massimo locale.
La legenda descrive i colori nativi; i PNG in nativi conservano una cella per pixel. Il bianco indica celle vuote.
Velocita: PowerNorm γ = 3, inferno. Scarto relativo: scala lineare 0–60%, cividis.

Mappa 05: zoom fisso, celle native

4886 asteroidi · 2,133,757 traiettorie distinte · scale comuni tra tutte le risoluzioni

Stessa finestra fisica in ogni riga: tre celle consecutive della griglia 100 × 100, pari al 3% del dominio per asse.
I colori dello zoom sono quelli nativi; i bordi delle celle vengono rispettati, senza interpolazione o avvolgimento angolare.
Velocita: PowerNorm γ = 3, inferno. Scarto relativo: scala lineare 0–60%, cividis.
