Arco colorato: span minimo contenente i perigei. Tratteggio grigio: massimo gap vuoto.
Pallini e arco hanno lo stesso S della fascia; ogni traiettoria conta una volta. Stessa scala nelle tre tolleranze.

Copertura angolare × numero di perigei — tolleranza ±5,000 km
S = N × (360° − massimo intervallo angolare vuoto)

21 fasce disgiunte · 341/341 perigei inclusi

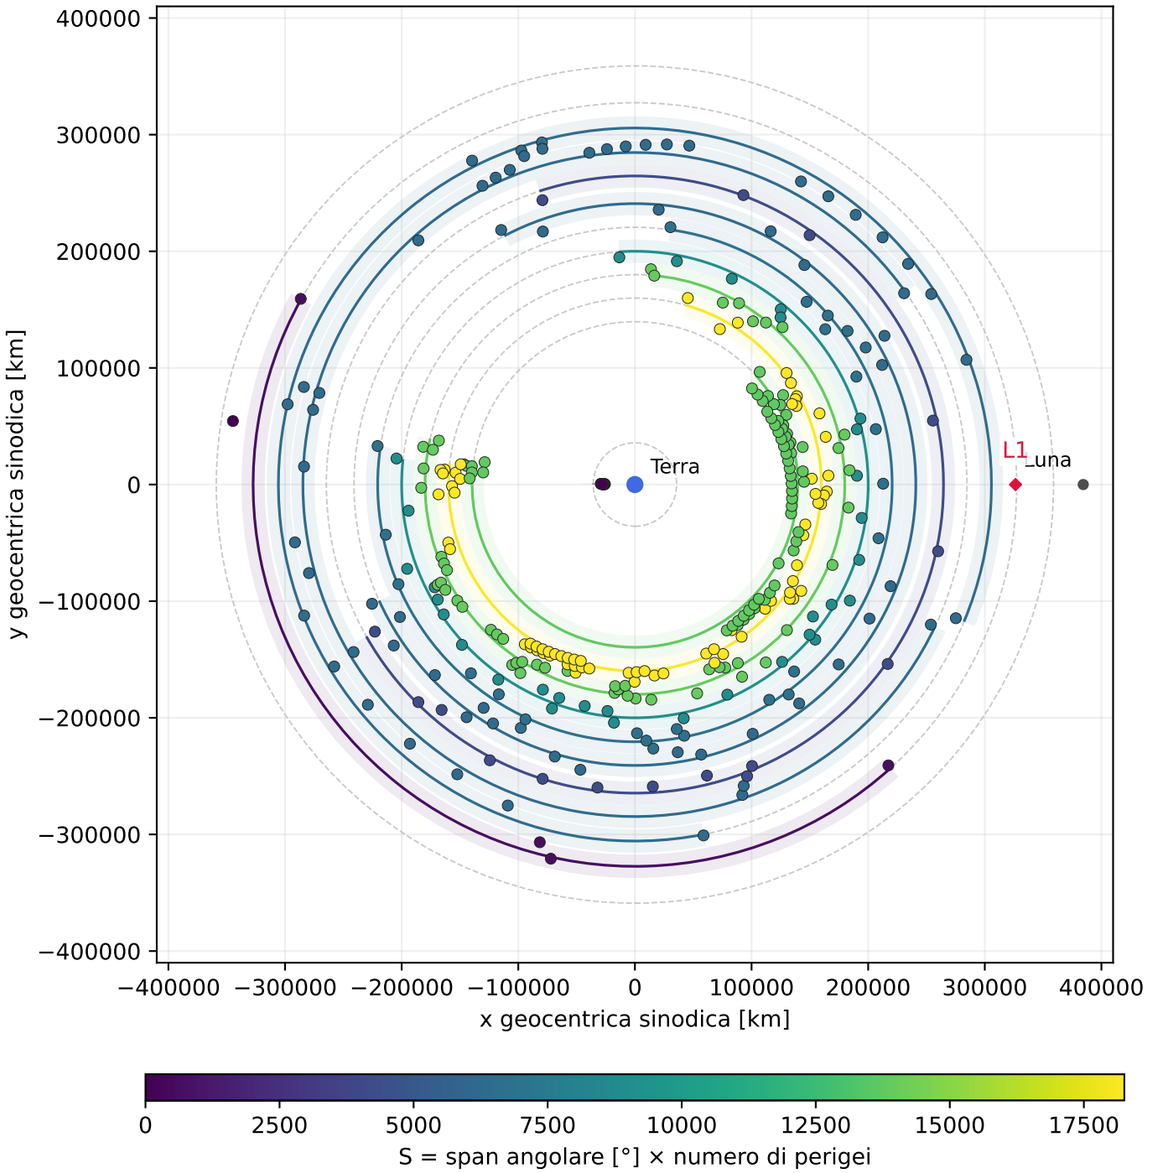

Raggio dal centro terrestre · span in gradi · S = N × span
